Subject: AZ Queen Creek TMDL accounting
Attachments: Queen Creek JD.jpg

Hi Dave,

Segment UQE has an active AJD against it. In the attached, it is the stream system in the East Plant. The Queen Creek TMDL will still require addressing the loading coming off that system, but it is not a water segment for CWA purposes while that determination is maintained.

UQ3, UQ10, and Arnett Creek are still CWA segments that are part of that draft TMDL.

Thank You,
Matt
